Projects / Practical Work

EcoSphere (https://kotanaveen533.github.io/Ecosphere_Projecd_1/)

- Developed a web-based platform (EcoSphere) that facilitates the buying and selling of household scrap. The project addresses India's waste management challenges by digitizing the recycling process. Users can register as buyers or sellers and manage scrap listings efficiently.
Technologies used: HTML for structure, CSS for design, and JavaScript for interactive features.

University (<https://kotanaveen533.github.io/KotaNaveen/>)

- The "World Best University Website" project is a website that shows information about a university. It helps students and visitors learn about courses, campus facilities, admissions, and student life. The main goal is to make the website look good and easy to use.
Technologies used: HTML – to create the structure of the website, CSS – to make the website look attractive, JavaScript – to add interactive features
